

Applebee's Support Center Kansas City, Kansas

This 120,000 square foot office and support headquarters building was designed by Berkebile Nelson Immenschuh McDowell (BNIM) Architects.

Delta Innovative Services was contracted to install a lightweight insulating roof deck with a premium GAF TPO roof system. The Elastizel roof deck system was subcontracted to Western Fireproofing.

The final roof design was accomplished through design/build consultation between Delta, BNIM, GAF, Western Fireproofing, and J. E. Dunn Construction (the general contractor).
