

Elementary School #17 Lee's Summit, Missouri

This 80,000 square foot new elementary school was designed by Hollis and Miller Architecture for the Lee's Summit Missouri School District.

Delta Innovative Services was the low bidder for the roofing and sheet metal. Delta completed the roofing portion of the contract in near-record time, allowing the school to be completed in a timely manner.

J and L Sheet Metal was Delta Service's sheet metal subcontractor. The roof system was a GAF modified roof, and the construction manager was J. E. Dunn Construction.
