

School District Office Lee's Summit, Missouri

Lee's Summit School District awarded Delta Innovative Services the roofing and sheet metal work on this 50,000 square foot school support building.

Delta installed two different roof systems; a Tremco built up coal tar gravel surfaced roof and a GAF modified bitumen roof system.

The architect was Hollis and Miller Architecture, and the construction manager was J. E. Dunn Construction. J and L Sheet Metal was Delta Service's sheet metal subcontractor.
